MOBILE OPERATING TABLES
ALPHACLASSIC PRO
Since 1838, MAQUET has been a leader in the design and manufacture of professional and high standard operating tables. With 170 years of experience, MAQUET has become one of the leading global suppliers of operating room infrastructure equipment and recently therapeutic treatment accessories.

With its three divisions – Cardiovascular, Critical Care and Surgical workplaces, MAQUET offers innovative solutions in various medical disciplines that the healthcare professionals know and trust.

Benefiting from versatile design, the new ALPHACLASSIC PRO is the ultimate all rounder: As with all CLASSIC models, the table’s ability to go to very low levels facilitates a comfortable and ergonomic working height for the surgeon when seated. Thanks to its excellent longitudinal shift, exceptional X-ray machine access is assured. Additional applications are made possible due to the motorized back plate and the backlit hand control facilitates work in darkened environments (MIS). One of many pro’s to explore.

**Premium quality materials:** Metal and special hard fibre plates ensure long term stable use under maximum (250kg / 551lbs) loading. All surfaces are easy to clean and disinfect. From head to feet, radiolucent plates offer clean X-ray images, undisturbed by handles or other barriers.

80mm multi-layer SFC pads offer patients outstanding protection against pressure related complications. A MAQUET standard for exceptional comfort.

High quality stainless steel and aluminum alloy structure for top stability and durability.
Universal interfaces with quick click: Identical geometry of the mounting points offers great flexibility in all configurations: Leg plate and extension back plate are easily interchanged with a single click. A wide range of MAQUET accessories can therefore be fitted with the quick click system (no screws), which saves time and adds confidence in use.

Radiolucent back plate without any barriers, integrated cassette channel.

Safe 2-sided removal and clear tactile feedback of proper insertion.
PRO DIVERSITY
VERSATILE SURGICAL CONFIGURATIONS

Modular Assembly: Thanks to universal interfaces and MAQUET numerous accessories, ALPHACLASSIC PRO provides various configurations of table tops. Tall or short, large or slim, all applications and body types are catered for.

Head rest to back plate. Upper back plate to lower back plate. Leg plate to seat plate.
PRO DARK
VISIBILITY IN ALL SITUATIONS

Backlit hand control - light in darkness: Working in a darkened theatre such as during a MIS procedure is made easy thanks to the backlit panel. All available functions are highlighted. Combined with self-explanatory icons this provides the user with an intuitive indication for safe operation. FLEX / REFLEX and 0-level are integrated for quick positioning.
**PRO SPACE**

**PERFECT X-RAY ACCESS**

**Longer shift:** With a remarkable 310mm (12.2 inches) longitudinal shift (optional), C-arm access is optimized allowing for groin to head x-ray access. Up to 1100 mm (43.3 inches) in NORMAL and 1200 mm (47.2 inches) in REVERSE.
With the shorter back plate and shoulder module, whose side sections are detachable laterally, upper arms can be easily moved, revealed and positioned during Minimal Invasive Surgery (MIS) of the shoulder.

**PRO POSITIONING**

**SHOULDER SURGERY EXPERT**

**Excellent in shoulder MIS:** With shoulder surgery in mind, both types of shoulder sections from MAQUET can be mounted in NORMAL or REVERSE position.
PRO CHANGE
MORE POSSIBILITIES

**Normal or Reverse?** By interchanging back and leg sections, ALPHACLASSIC PRO gains significant X-ray access capabilities in standard configuration to fulfill the demands for C-arm scans.

ALPHACLASSIC PRO
PRO ERGONOMICS

**Ergonomic height adjustment:** With 600mm – 950mm height adjustability, whether sitting or standing, surgeons can find an ergonomic working height during surgery with an ALPHACLASSIC PRO. The smart combination of table top angles with section lengths enables unique possibilities.
ALPHACLASSIC PRO
PATIENT POSITIONINGS

Supine position in NORMAL.

Supine position with carbon-fiber module for orbital (360°) C-arm access.

Lithotomy position with Goepel leg holder for gynecological surgery.

Lithotomy position with seat elongation for urological surgery.

Beach chair position with shoulder module.

Neurosurgery in extreme low position.
ALPHACLASSIC PRO
PATIENT POSITIONINGS

Lateral position for kidney surgery.

Positioning for minimally invasive surgery with excellent freedom of access.

ALPHACLASSIC PRO with extension device for trauma surgery.

ALPHACLASSIC PRO with spinal frame.

Shorter table top in REVERSE.

Shorter table top in NORMAL.
COMPREHENSIVE SERVICES
MCCARE SERVICES

MAQUET’s MCCare Services support and service program offers a variety of customer support options. In addition to maintenance and repair, these services include training in applications and patient positioning workshops. MAQUET’s further training offerings include symposia regarding new treatment options and e-learning programs. Additional options include financing concepts for equipment and clinical staff.

“Empowering our customers” – means more decision-making flexibility for customers and thus greater cost effectiveness. With its MCCare Services, MAQUET offers tailored and flexible support and services for its entire product range, thus providing added value for the entire product lifespan. The scope of the support, the right service package, and additional options are determined in conjunction with the customer and adapted to meet the specific needs of the healthcare facility. There are four types of service agreement available to cover different scopes of service:

- MCCare Preventive
- MCCare Plus
- MCCare Professional
- MCCare Partner
